

I. Introduction to Language Fundamentals

Language, in its written form, is constructed from basic units that combine in specific ways to create meaning. Understanding these units is foundational to analyzing grammar.

Letters

1. **Definition:** The smallest individual units of a written language system.

2. **Function:** They represent sounds (phonemes) but individually carry no inherent meaning.

* Example: A, B, C, K, L, P

Alphabet

1. **Definition:** The complete, standardized set of letters used in a language, typically arranged in a fixed order. It represents the collection of all basic written symbols.
2. **Details:** The English alphabet contains 26 letters.
3. **Distinction:** While 'A' is a letter, the entire sequence **A-Z** is the alphabet.

Vowels and Consonants

The letters of the English alphabet are categorized based on their pronunciation and role in syllable formation:

Vowels (Swar)

- a. **Definition:** Letters representing sounds produced with an open vocal tract.
- b. **Function:** They form the nucleus of most syllables.
- c. **English Vowels:** A, E, I, O, U (5 letters)

Consonants (Vyanjan)

- a. **Definition:** Letters representing sounds produced with some obstruction or constriction in the vocal tract. All letters other than a, e, i, o, u

Words

Definition: A single, distinct meaningful element of speech or writing.

Formation: Words are formed by combining letters according to the phonological and morphological rules of a language.

Requirement: Must be a meaningful collection of letters. Random letter combinations do not constitute words.

Example: 'Book' (formed from B, O, O, K) is a word. 'KBOO' is not a meaningful word in English.

The Hierarchy of Structure

- a. **Letters** combine to form **Words**.
- b. **Words** combine to form **Phrases**
- c. **Words** and **Phrases** combine to form **Clauses**
- d. **Clauses** (and sometimes additional phrases/words) combine to form **Sentences** (complete units of thought expressing a statement, question, command, etc.).

II. Introduction to Parts of Speech (POS) - Overview

To understand how words function within sentences, words are categorized based on their grammatical properties and roles. These categories are known as Parts of Speech (or Word Classes). This categorization helps in analyzing sentence structure and meaning. English traditionally recognizes 8 core parts of speech, with Determiners often considered a 9th functional category.

Definition: Parts of Speech are categories assigned to words based on their syntactic function (how they behave grammatically in a sentence) and sometimes their morphological form (how they change, e.g., tense, plural).

Purpose: To classify words, understand their roles, and analyze sentence structure.

The Core Parts of Speech (Brief Overview)

1. Noun

- a. **Function:** Names a person, place, thing, idea, quality, feeling, group, or concept.

2. Pronoun

Function: Replaces a noun or noun phrase to avoid repetition or when the noun is implicit.

Purpose: Avoids repetition, used when speaker refers to self (I/We) or listener (You).

Examples: I, you, he, she, it, we, they, me, him, her, us, them, myself, who, this.

3. Adjective

Function: Modifies (describes or qualifies) a noun or pronoun, providing more information about its qualities or state.

Examples: beautiful, red, smart, big, American, Indian, good, tall, happy, worried, circular.

4. Verb

Function: Expresses an action, occurrence (event/happening), or state of being. The core of the predicate.

Examples: run, eat, is, look, seem, study, teach, love, hate, live, work, play.

5. Adverb

Function: Modifies a verb, an adjective, or another adverb. Provides information about manner (how), time (when), place (where), frequency (how often), degree (to what extent), reason (why), etc.

Examples: slowly, very, here, now, often, really, fast, hard, well, beautifully, yesterday.

6. Preposition

Function: Shows the relationship between a noun/pronoun (its object) and other words in the sentence. Often indicates location, time, direction, or other relationships.

Examples: in, on, at, under, over, between, with, for, from, to, of, about, across.

7. Conjunction

Function: Connects words, phrases, or clauses.

Examples: and, but, or, so, because, if, when, that, although.

8. Interjection

Function: Expresses sudden emotion or reaction. Often stands apart grammatically from the rest of the sentence.

Definition: Shows "sudden reactions and feelings."

Examples: Wow! Ouch! Oh! Alas! Hurrah! Oops

9. Determiner

- a. **Function:** Introduces a noun. Specifies the noun's referent (e.g., the book vs. a book) or quantity (many books). Includes articles, possessives, demonstratives, numbers, quantifiers.
- b. Note: Traditionally considered a type of adjective, but modern grammar often treats it as a separate class due to its specific function.

III. Sentence Structure: Core Elements

A. Sentence

Formal Definition: A grammatically complete unit of expression, typically containing a subject and a predicate, conveying a statement, question, exclamation, or command.

"A group of words that gives a meaningful sense." Contains a subject and a predicate.

Or "A meaningful collection of words having its own subject and verb."

4. **Key Components:** Subject + Verb (forming a clause) are essential for a minimal sentence.

B. Subject and Predicate

A sentence can be divided into two main parts:

1. **Subject:** Who or what the sentence is about. It typically performs the action of the verb or is described by the predicate.

2. **Predicate:** What is said about the subject. It always contains the verb and may include objects, complements, and adverbials that modify the verb or sentence.

The part of a sentence (or clause) stating something about the subject. It includes the verb and everything governed by or modifying the verb (objects, complements, adverbials). Essentially: Everything that is NOT the subject.

3. Identifying the Subject:

- a. **For Action Verbs:** Ask "Who?" or "What?" performed the action. The answer is the subject (the doer or agent).
- b. **For State Verbs:** Ask "Who?" or "What?" is being described or is in the state mentioned. The answer is the subject (the topic).

Radhika | looks beautiful.

Piyush | has done his work.

Shiva | works in a bank.

IV. Objects

Objects are essential components in sentences with transitive verbs, receiving the action or related to a preposition.

Objects is, A noun, pronoun, or noun phrase that is affected by the action of a transitive verb or follows a preposition.

"The object is the person or thing that is affected by the action of the verb." "Reply of **What** or **Whom** is Object."

Types of Objects

1. **Object of the Verb:** Directly related to the verb.

a. **Direct Object (DO):** Answers "What?" or "Whom?" after the verb. Receives the action directly. Most common type.

Examples

1. She bought **a car**. (Bought what? -> a car)
2. I saw **Radhika**. (Saw whom? -> Radhika)

b. **Indirect Object (IO):** Answers "To whom/what?" or "For whom/what?" the action is done. Usually appears before the Direct Object and requires a DO to be present. Indicates the recipient or beneficiary.

- She gave **me a book**.
(Gave what? -> a book (DO). Gave to whom? -> me (IO)).
- He bought **her flowers**.
(Bought what? -> flowers (DO). Bought for whom? -> her (IO)).
- Ramesh gave a **ring** to **Priya**.
(Gave what? -> ring (DO). To Whom? -> Priya (IO often expressed as OP here)).

2. **Object of a Preposition (OP):** The noun, pronoun, or noun phrase that follows a preposition and completes its meaning.

Rule: Every preposition must have an object (or object phrase).

Examples-

The book on **the table** is mine. ('the table' is OP of 'on').

She was waiting for **me**. ('me' is OP of 'for').

C. Identifying Objects - Key Tests

1. Does it answer "**What?**" or "**Whom?**" after an action verb? -> Likely Verb Object.
2. Does it immediately follow a preposition? -> Likely Preposition Object.
3. Is the entity different from the subject and receiving the action? -> Likely Verb Object.

D. What Objects Can Be

Only Nouns, Pronouns, or Noun Phrases (and sometimes other structures like Gerunds or Infinitives acting nominally) can function as objects. Adjectives and Adverbs cannot be objects.

V. Complements

Definitio: A word or group of words that is necessary to complete the meaning of a subject (with a linking verb) or an object (with certain transitive verbs).

Difference from Object: Complements describe or rename the subject/object; Objects receive the action. Complements often follow linking verbs (is, seem, become) or state verbs.

There are two types of complements

- A. Subject Complement
- B. Object Complement

A. Subject Complement: Follows a linking verb (is, am, are, was, were, seem, look, become, feel, etc.) and modifies or refers back to the subject.

- a. Test: Subject = Subject Complement (or Complement describes Subject).
- b. Can be: Noun/Noun Phrase (renaming) or Adjective/Adjective Phrase (describing).

c. Examples:

1. Sagar is a teacher. (Sagar = Teacher; Noun Phrase SC)
2. Radhika looks **beautiful**. (Beautiful describes Radhika; Adjective SC)
3. He seemed **worried**. (Worried describes He; Adjective SC)
4. My best friend is **he**. (He = My best friend; Pronoun SC - less common structure)

2. Object Complement: Follows a Direct Object and modifies or refers back to the object. Often used with verbs like make, elect, consider, call, name, find.

- a. Test: Direct Object = Object Complement (or Complement describes Direct Object).
- b. Can be: Noun/Noun Phrase (renaming) or Adjective/Adjective Phrase (describing).

c. Examples:

1. Circumstances made the **brothers enemies**.
2. The committee elected **Mr. Sinha** President.
3. I consider **him intelligent**. (Intelligent describes him; Adjective OC)
4. We painted the door **blue**. (Blue describes the door; Adjective OC)

VI. Adverbials

Adverbials are words, phrases, or clauses that function like **adverbs**, **modifying verbs**, **adjectives**, other **adverbs**, or entire **sentences/clauses**. They provide information about circumstances like time, place, manner, reason, etc.

A. Definition: A sentence element providing circumstantial information (time, place, manner, frequency, reason, degree, etc.). Functions grammatically like an adverb.

B. Function Recap (Answers questions like):

- a. **Where?** (Place) - here, there, in the garden, on the table
- b. **When?** (Time) - now, then, yesterday, recently, on Monday, that day
- c. **How?** (Manner) - fast, hard, slowly, beautifully, carefully, peacefully
- d. **How often?** (Frequency) - always, never, sometimes, often, weekly, twice
- e. **Why?** (Reason) - because he is my brother (clause), due to rain (phrase)
- f. To what extent? (Degree) - very, really, quite, too, enough, almost

C. Realization (How Adverbials Appear)

- a. Single Adverbs: here, sweetly, fast, very, really, always, not, still.
- b. **Prepositional Phrases:** Often indicate place or time. e.g., in Delhi, on Monday, behind a tree, on the table.
- c. **Noun Phrases:** Can sometimes indicate time. e.g., that day, last week.
- d. **Adverb Clauses:** Subordinate clauses providing circumstantial info. e.g., when Radhika came, because he is my brother.

D. Distinction: Adverb vs. Adverbial

- 'Adverb' is a Part of Speech (a word class).
- 'Adverbial' is a Syntactic Function (a role in the sentence).
- A single adverb (POS) often functions as an adverbial (Function).
 - Ex: He ran **fast**.
- A prepositional phrase (POS group) can function as an adverbial (Function). Ex: He lives **in Delhi**. ('in Delhi' is a prep. phrase functioning as an adverbial of place).

VII. Phrases

Formal Definition: A sequence of two or more words arranged in a grammatical construction and acting as a unit in a sentence, lacking the subject-predicate structure of a clause.

"Group of words... does not have a subject-verb combination... does not give complete meaning [on its own]."

1. Group of two or more words.
2. Acts as a single part of speech (like a noun, adjective, adverb).
3. Has a central or 'head' word that determines the phrase type.
4. Does not have its own Subject + Finite Verb combination.
5. May contain non-finite verbs (infinitives, participles, gerunds).

C. Types of Phrases (Based on Head Word or Function)

1. Noun Phrase (NP)

- a. **Head Word:** Noun or Pronoun.
- b. **Function:** Acts as a noun (Subject, Object, Complement, Object of Preposition).
- c. **Structure Examples:**
 - a. Determiner (Article) + Noun: a teacher
 - b. Determiner + Adjective + Noun: a good teacher, a new table
 - c. Determiner + Adverb + Adjective + Noun: a very beautiful girl, a very attractive car
- d. Noun + Prepositional Phrase (acting adjectivally):
the girl in red saree, **the place** of his birth
- e. noun + Participle Phrase (acting adjectivally):
the boy standing there

Examples:

my best friend, two letters, the book on the table (can be viewed as NP head 'book' + modifier)

2. Adjective Phrase (AdjP)

Head Word: Adjective.

- a. **Function:** Acts as an adjective (modifies Noun/Pronoun, or acts as Complement).
- b. **Structure Examples:**
 1. Adverb + Adjective:
very beautiful, really hard, quite mobile, very interesting, so annoying, too intelligent
 2. Adjective + Prepositional Phrase:
fond **of music**
 3. Adjective + Adverb:
brave enough
- c. Note: A single adjective can sometimes be considered a minimal adjective phrase.

3. Adverb Phrase (AdvP)

- a. **Head Word:** Adverb (or functions as an adverb).
- b. **Function:** Acts as an adverb (modifies Verb, Adjective, Adverb, Clause).
- c. **Structure Examples:**
 4. Single Adverb: here, fast, recently
 5. Adverb + Adverb: very fast, really hard
 6. Prepositional Phrase functioning adverbially:
in Delhi, on Monday, in the garden

4. Prepositional Phrase (PP)

- a. **Head Word:** Preposition.
- b. **Structure:** Preposition + Object (Noun Phrase or Pronoun).
- c. **Function:** Acts as an Adjective (modifying noun) or an Adverb (modifying verb, adjective, adverb - indicating place, time, manner etc.).
- d. **Examples:**
 - in red saree(Adj),
 - for me (Adv?),
 - in the garden (Adv),
 - on sunday(Adv),
 - of his birth (Adj),

- on the table (Adv or Adj),
- between a temple and a hospital (Adv)

5. Verb Phrase (VP)

- a. Head Word: Verb.
- b. Structure: Main Verb + any Helping Verbs + sometimes associated Objects, Complements, Adverbials.
- c. Function: Forms the predicate or part of the predicate.
- d. Examples: *is playing, has bought, does not like, was waiting, should be given*

VIII. Clauses

"Group of words having a subject and a verb combination." Can be independent or dependent.

A group of words containing a subject and a predicate (finite verb) and forming part of a compound or complex sentence, or constituting a simple sentence by itself.

The key difference is the presence of a Subject + Finite Verb pair in a clause, which is absent in a phrase.

C. Types of Clauses

- a. Main Clause
- b. Coordinate Clause
- c. Subordinate Clause

A. Main Clause

- a. **Definition:** Expresses a complete thought and can stand alone as a grammatically complete sentence.
- b. **Structure:** Contains a subject and a finite verb.
- c. **Introduction:** Does not start with a subordinating conjunction. May stand alone or be joined to other clauses by coordinating conjunctions or punctuation.

d. **Examples:**

1. Radhika is beautiful.
2. I like sweets
3. He lives in Delhi
4. The killer will be arrested (in **May the killer be arrested**)

B. Coordinate Clause / Dependant clause

- a. **Definition:** An independent clause that is linked to another clause of equal grammatical rank (usually another main clause) by a coordinating conjunction (FANBOYS: For, And, Nor, But, Or, Yet, So).
- b. **Structure:** Coordinating Conjunction + Subject + Predicate.
- c. **Function:** Presents information of equal importance to the clause it's joined to.
- d. **Examples:**
 1. and she loves me.
 2. but his parents live in UP.
 3. or he could have been caught.
 4. and Man-made machines.

C. Subordinate Clause (Dependent Clause)

- a. **Definition:** Does not express a complete thought and cannot stand alone as a sentence. It depends on the main clause for its full meaning.
- b. **Structure:** Subordinating Conjunction + Subject + Predicate.
- c. **Function:** Functions within the sentence as a single part of speech (like a noun, adjective, or adverb) modifying the main clause or an element within it.

Examples:

- that she had passed the exam.
- when she will come.
- When she comes back
- If he asks me

IX Sentence Types Based on Structure

A. Simple Sentence / Main Clause

- **Definition:** Contains only one independent (main) clause and no subordinate clauses. It expresses a single complete thought.
- **Structure:** Subject + Predicate (containing one finite verb).

Examples:

1. Radhika is beautiful.
2. Shivam reads this book.
3. Vivek will teach maths.
4. Rinki is with Sachiv Ji.

B. Compound Sentence

- **Definition:** Contains two or more independent (main or coordinate) clauses joined by a coordinating conjunction (FANBOYS: For, And, Nor, But, Or, Yet, So) or sometimes by punctuation like a semicolon. Each clause expresses a complete thought and is grammatically equal.
- **Structure:** Main Clause + Coordinating Conjunction + Main/Coordinate Clause.

Examples:

1. Radhika lives in Delhi, **but** her parents live in UP.
2. Kavita was my best friend, **and** I always helped her.
3. God made Man, **and** Man-made machines.
4. He hid behind a tree, **or** he could have been caught.

C. Complex Sentence

- a. **Definition:** Contains one independent (main) clause and at least one dependent (subordinate) clause. The subordinate clause cannot stand alone and depends on the main clause for its meaning. The clauses are linked by a **subordinating conjunction** (e.g., because, when, if, that, although, since) or a relative pronoun (who, which, that).

- b. **Structure:** Main Clause + Subordinate Clause
OR Subordinate Clause + Main Clause.

c. **Examples:**

- Radhika told me **that she had passed the exam.**
- I don't know **when she will come.**
- **When she comes back,** we will watch a movie.
- I will help him **if he asks me.**

X. Sentence Types Based on Function (Purpose)

Sentences can also be classified based on the speaker's/writer's purpose or intent.

- A. Assertive / Declarative
- B. Interrogative Sentence
- C. Imperative Sentence
- D. Exclamatory Sentence
- E. Optative Sentence

A. Assertive (or Declarative) Sentence

- **Function:** Makes a statement, declares a fact, or conveys information. Ends with a period (.).
- There are two types of declarative sentences
- a. Affirmative sentences
 - b. Negative sentences

a. **Affirmative:** States something positively.

Structure: Subject + Helping Verb (optional) + Main Verb + ...

Examples:

1. Soham is playing in the park.
2. His car is very beautiful.

- b. **Negative:** Denies something or states something negatively. Typically includes 'not' or other negative words (never, no one, nothing, hardly, etc.).

Structure: Subject + Helping Verb + not + Main Verb + ... (or uses other negative words).

Example

1. Kavita never hurts me.
2. No one is ready..

B. Interrogative Sentence

- **Function:** Asks a question. Ends with a question mark (?).

There are two types of Interrogative sentences

- a. Yes/No Questions
- b. WH Questions

- a. **Yes/No Questions:** Can be answered with 'yes' or 'no'. Start with a helping verb (auxiliary or modal).

Structure: Helping Verb + Subject + Main Verb + ...?

Example

1. Are you still reading this book?
2. Did Radhika call me?
3. Has he worked with you?

- b. **WH- Questions:** Ask for specific information using WH-words (What, When, Where, Who, Whom, Whose, Which, Why, How).

Structure: WH-Word + Helping Verb + Subject + Main Verb + ...? (Exception: When WH-word is the subject, e.g., Who came?).

Example

1. What do you like about me?
2. Why was she laughing?
3. When will he come?

C. Imperative Sentence

- **Function:** Gives a command, makes a request, offers advice, or gives a suggestion. The subject ('You') is usually implied and not stated (unwritten). Ends with a period (.) or an exclamation mark (!).
- **Structure:** Typically starts with V1 (base form of the verb).
- Negatives start with 'Don't' or 'Never'.
- Requests often use 'Please'.
- Let-structures are also imperative.

Examples:

1. Come here. (Command/Request)
 2. Work hard. (Advice)
 3. Don't waste your time. (Advice/Command)
 4. Never help him. (Advice/Command)
 5. Please help me. (Request - implied 'You' subject)
 6. Let me go. (Request/Permission)
 7. Let's go. (Suggestion)
- Long live the King!
 - Wish you a Happy Journey!
 - May God bless you!

D. Exclamatory Sentence

- **Function:** Expresses strong or sudden emotion (surprise, joy, sorrow, excitement, anger, etc.). Ends with an exclamation mark (!).
- **Structure:** Often starts with 'What' or 'How' modifying an element, or uses an interjection. The word order might be slightly different from assertive sentences.

Examples:

1. How beautiful!
2. How pretty she is!
3. What a surprise!
4. What a beautiful smile she has!
5. Wow! She looks stunning!
6. Alas! He lost his parents!

E. Optative Sentence

- **Function:** Expresses a wish, prayer, blessing, or curse. Often uses 'May' or 'Wish'. Can end with an exclamation mark (!) or sometimes a period (.).
- **Structure:** Often starts with 'May' followed by Subject + V1. Sometimes uses 'Wish' or 'Long live'.
- **Examples:**
 - May peace prevail on Earth!
 - May you be courageous!

XI. Handling Word

Ambiguity: POS Depends on Function

Don't assume a word is always the same POS. Look at its role: Does it name something (Noun)? Describe a noun (Adjective)? Describe an action (Adverb)? Join clauses (Conjunction)? Show relation (Preposition)?

Words with Multiple Parts of Speech

1. Fast

1. A **fast** car.
2. He runs **fast**.
3. He broke his **fast**.
4. They **fast** on Mondays.

2. Hard

1. He worked **hard**.
2. The test was a real **hard**.

3. Mobile

1. She bought a new **mobile**.
2. She is quite **mobile** after her surgery.

4. Red

1. This shirt is **red**.
2. This is a **red** shirt.
3. **Red** is my favorite color.

5. This

- **This** shirt is red.
- **This** is a red shirt.
-

6. Each

1. **Each** of the boys received a prize.
2. **Each** boy should attend the meeting.

7. V-ing Forms (Working, Smoking)

1. The **working** man is honest.
2. The man is **working**.

8. Book

1. Read a **book**.
2. **Book** a ticket.

9. Water

1. Drink some **water**.
2. **Water** the plants.

10. Story

1. Tell a **story**.

2. A **story** book.

11. Round

1. A **round** table.
2. We're in the first **round**.
3. **Round** the corner.
4. He came **round** later.
5. He ran **round** the tree.

12. Train

1. I took the **train**.
2. I need to **train** for the marathon.

13. Light

1. Turn on the **light**.
2. **Light** the candle.
3. A **light** jacket.

14. Like

1. I **like** ice cream.
2. She sings **like** an angel.
3. He always talks about his **likes** and dislikes.

15. Close

1. **Close** the door.
2. We live **close** to the park.
3. He held her **close**.
